

# SCREED TAPE

Ideal for sticking screed foils or polythene membrane in the overlap area.

## OVERVIEW

Standard adhesion adhesive tape, ideal for sticking screed foils or polythene membrane in screeding applications.

Highly resistant to U.V. light and high and low temperatures.

## BACKING

Bi-oriented polypropylene film 28 µm thickness

## ADHESIVE

Adhesive 65

Waterbased solvent free acrylic adhesive. Adhesive colour variations: Brown (AV), White (BI), transparent (TR)

## BENEFITS

- High adhesive grab
- Works well in cold temperatures
- Works well in warm temperatures
- Wide adhesive face for greater coverage

## TECHNICAL DATA

Characteristic	Unit	Standard Value
Backing thickness	µm	28
Tensile strength	kg/cm	4.9
Elongation	%	145
Total thickness	µm	49
Adhesion to steel	g/cm	240
